

# AER MANUFACTURED HOMES TIMELINE

This timeline represents the typical process for purchasing and installing a manufactured home. The **orange text** highlights steps specific to the Advanced Energy Rebuild (AER) program.

\* Contact program staff for eligibility and more information

† Customers may wish to order their home without an affixed meter panel to allow for the home to be manufactured while PG&E designs the new service. This allows greater flexibility for placement of the panel when the home is delivered to the site. Please discuss with your retailer before ordering your home.
